SUMMARY

Detail-oriented Cloud Computing fresher with a BBA-CA background and MCA specialization in Cloud Computing. Hands-on experience in developing, deploying, and managing web and mobile applications using Python (Django), Flutter, Supabase, and Linux environments on AWS and GCP. Skilled in cloud infrastructure setup, virtual servers, storage management, IAM, VPC networking, and scalable application deployment. Strong interest in Cloud Engineering, System Administration, and DevOps practices.

TECHNICAL SKILLS

- **Cloud Platforms:** AWS (EC2, S3, IAM, VPC, Security Groups), GCP (Compute Engine, Cloud Storage), Docker
 - **Operating Systems:** Linux (Ubuntu), Windows, SSH (PuTTY)
 - **Programming & Development:** Python, Django, HTML5, CSS3, JavaScript, Bootstrap, Flutter, Dart
 - **Databases:** MySQL, SQLite, Supabase (PostgreSQL)
 - **Version Control:** Git, GitHub
 - **Tools:** VS Code, Android Studio, Figma, Canva
 - **Core Concepts:** Cloud Computing, Virtualization, Networking, REST APIs, Scalable Systems, System Deployment, Server Configuration, Instance Management, CI/CD Basics
-

EXPERIENCE

Social Media Management Intern - Mes Garware College of Commerce - 2023 – 2025

- Designed digital assets and website layouts using Canva for institutional branding.
 - Managed structured data and reports using Excel for campaign tracking.
 - Collaborated in team-based digital campaigns, improving engagement and consistency.
 - Developed organizational, communication, and content management skills in a professional environment.
-

PROJECTS

ChatNova – Real-Time Messaging Application | GitHub

Tech Stack: Flutter, Supabase, Dart

- Developed a cross-platform real-time messaging app using Flutter and Supabase with authentication, group chat, media sharing, and message management features.
- Implemented Supabase (PostgreSQL) backend and optimized real-time data handling for scalable communication and efficient database performance.

FlavorVault – Recipe Management System with E-Commerce | GitHub

Tech Stack: Django, Python, HTML, Bootstrap, JavaScript, SQLite

- Built and deployed a Django-based full-stack web application on Linux AWS EC2 using SSH (PuTTY) and Docker with recipe, cart, and checkout features.
 - Designed RESTful APIs and optimized database models with search and filtering for scalable backend performance.
-

EDUCATION

Master of Computer Applications (MCA) – Cloud Computing

Ajeenkya DY Patil University (Affiliated with SEAMEDU), Pune | 2025 – 2027

Bachelor of Business Administration in Computer Applications (BBA-CA)

Mes Garware College of Commerce, Pune | 2022 – 2025
